SERVICE TECH, INC.

Activated Carbon Engineering Sales & Service

Service Tech, Inc. is your only source for activated carbon equipment and service. We specialize in liquid phase equipment for applications to 1,400 gpm and vapor phase units to 5,000 cfm. Our custom manufacturing offers a tremendous assortment of possible equipment combinations. These options include the choice of virgin or reactivated carbon, connection type and assorted accessories. This custom manufacturing approach allows the customer to purchase the most appropriate adsorber for a given application. So, whether you're shopping for the least expensive options on the market, or have specific equipment requirements, Service Tech, Inc. has your adsorber. Call today to discuss how we can assist with your environmental efforts.
